Boral **TruExterior®** Siding & Trim

Product Guide

Products shown: Bevel Siding, Trim

So Authentic. So Reliable. Nothing Compares.

Boral TruExterior® Siding & Trim offers real workability that exceeds that of wood without sacrificing the look, feel and character of traditional wood products, creating a balance of performance and aesthetics that cannot be found with other manmade alternatives.

Pioneering an entirely new category of building materials made with the revolutionary poly-ash material, Boral TruExterior® Siding & Trim is the only product available today that addresses both the moisture- and movement-related issues commonly seen with other exterior materials on the market.

addresses both moisture- and movement- related issues

Moisture

Boral TruExterior® products contain no wood fiber, preventing the moisture-related issues that commonly plague wood, wood composites and fiber cement.

- Virtually no moisture cycling
- No need to prime ends or field cuts
- Resists rot and termite attacks†
- No swelling†
- No cracking or splitting
- No cupping or checking†
- Suitable for ground contact

Movement

Boral TruExterior® products offer a high level of dimensional stability, eliminating many of the movement-related issues seen with PVC and vinyl.

- Maintains a high level of dimensional stability†
- Installation is the same regardless of the season
- No special precautions or adhesives to control or limit movement
- No need for special paints
- No limitations on paint colors

†Please see Boral TruExterior® Siding & Trim Limited Warranties and Product Data Sheets for proprietary test results, located at www.boraltruexterior.com. Always follow local building codes and construction best practices. See the complete Installation Guidelines for Boral TruExterior® Siding & Trim at www.boraltruexterior.com.

Cut. Fasten. Paint. **Done.**

It really is that simple. That's because Boral TruExterior® Siding & Trim offers phenomenal performance, remarkable workability and a lasting look while eliminating the need for gluing, gapping and other cumbersome and costly installation techniques.

Application

- Designed for use in non-structural applications
- Suitable for ground contact
- Can be used in moisture-prone areas

Expansion & Contraction

- No special precautions or adhesives are required to control or limit movement caused by moisture or temperature changes
- Traditional exterior-grade caulks, auto-body or wood fillers are all acceptable for filling nail holes

Tools

- Installed using proven woodworking tools and methods
- Carbide-tipped blades and bits are recommended for a longer tool life

Fastening

- Accepts a wide variety of high-quality exterior-grade fasteners that are suitable for the local environment
- Can be fastened close to the edge
- No need for pre-drilling
- No mushrooming

Painting

- Boral TruExterior® products come pre-primed and do require paint
- No need to prime end cuts
- Can be painted with any high-grade exterior paint when following the paint manufacturer's instructions
- Can be painted any color without special precautions as it is not prone to movement caused by heat gain from dark colors†
- Paint lasts longer than on wood because Boral TruExterior® products cycle virtually no moisture†

SIDING BEADBOARD TRIM ACCESSORIES

Bevel Collection

About the Bevel Collection

Bevel Siding is the newest addition to Boral TruExterior® Siding – the first manmade siding profiles to genuinely replicate the natural aesthetic of real wood while maintaining a high level of dimensional stability.

Recreating the look and character of traditional clapboard or bevel lap siding, Boral TruExterior® Siding's Bevel profile offers the true taper and shadow line effect historically seen with cedar and redwood siding, without the moisture-related issues that commonly plague wood.

Craftsman Collection™

About the Craftsman Collection™

The Boral TruExterior® Siding Craftsman Collection™ offers a variety of authentic, full-thickness profiles with bold, defined shapes and the natural aesthetic of traditional wood siding, all without the maintenance and upkeep associated with exterior wood products.

Six historically and architecturally accurate profiles – Channel, Channel Bevel, Cove/Dutch Lap, Nickel Gap, Shiplap and V-Rustic – are the ideal solution for homeowners who desire the look, feel and character of authentic wood siding while avoiding rotting, cracking, splitting and termite attacks.

V-Rustic

The V-Rustic profile features a deep "V" groove that creates an appealing shadow line effect

Available Finish:

Beadboard

About Boral TruExterior® Beadboard

Including 4-inch, double-4, 6-inch and double-6 profiles, Boral TruExterior® Beadboard is ideal for porch ceilings, soffits and decorative wall applications, and allows for a variety of installations, as it can be attached in either parallel or perpendicular directions.

The high level of dimensional stability[†] allows the product to be installed 24" on center without the need for additional backing for added support. Its "tongue-and-groove" design allows it to be fastened through the tongue, resulting in a clean look free from visible fasteners, or it can be reversed to offer a contemporary "V-groove" appearance.

Trim

About Boral TruExterior® Trim

Designed to be used in non-load-bearing applications, Boral TruExterior® Trim is suitable for ground contact and moisture-prone areas, which makes it ideal for exterior trim applications such as fascia, door trim, soffits, rake boards and a variety of other exterior applications. Because of its high level of dimensional stability†, there is no need to prime ends or field cuts. Plus, it can be painted any color. Boral TruExterior® Trim accepts a wide variety of fasteners and can be installed using standard woodworking tools and methods.
