- Café Royale -  
104

Imagine you buy a car with a flawless paint job, then park it in the blistering sun in your driveway for twenty years or more. Chances are you wouldn't do it, because it would damage the paint. Yet this is just one of the extremes the aluminum cladding on our windows and doors goes through, and why we insist that the highest quality powder-coating process in the industry come standard on every single one. Crafted to last, from start to beautiful finish.

- Dark Bronze -  
095/306

Over time, the advantages of our finishing process become very clear. Our AAMA 2604 and 2605 powder-coatings have the color retention, surface hardness and scratch resistance necessary to withstand even the harshest conditions. We feel so strongly about this, we've invested heavily in the technology to apply all powder-coatings in-house. Maintaining complete quality control over the entire process has stood the test of time - no other finish holds up to harsh conditions and resists fading so beautifully.

- Harvest Cranberry -  
010

Our powder-coating process has many environmental advantages. It is non-hazardous, contains no solvents, almost zero VOC's and no toxic compounds. What's more, only one coat is required during application, and the overspray can be reclaimed and recycled or reused. With liquid paint, multiple coats of high VOC chemicals are required with excess waste going into landfills. The process has even been removed from the EPA's recommended list. The low environmental impact of powder-coating aligns with

Sierra Pacific's support of the environment and our seed-to-window approach to manufacturing windows and doors.

We've never felt more confident about a clad finishing process. In fact, our powder-coating is holding up so well to the test of time and harsh conditions, we're able to protect you further with one of the toughest warranties ever created for aluminum clad finishes of this kind. It's one of the many benefits of windows and doors crafted with no compromise. See the actual warranty for more complete details at [SierraPacificWindows.com](http://SierraPacificWindows.com).

A LOOK YOU  
DON'T SEE, OR FEEL,  
EVERY DAY.

Pioneered by and available exclusively on Sierra Pacific windows and doors, with a matte finish and varying grit content to give it a rare, tactile appearance and feel, all available at standard pricing.

# PEARL METALLIC COLLECTION

El Cajon Silver 068

Platinum 067

Light Bronze Pearl 069

Medium Bronze Pearl 070

Dark Bronze Pearl 071

## THE SOFTER SIDE OF METALLIC.

The addition of pearlescent pigment gives this metallic collection a soft, elegant glow. As light hits the surface from various angles, colors may appear to shift slightly.

# METALLIC COLLECTION

A color palette inspired by metal elements, with metal flecks that create an iridescent, sparkling effect, the collection has a radiance that looks kissed by the sun.

Alpine Silver 062

Metallic Champagne 063

Bronze Classic 064

Classic Copper 088

Copper Penny 065

# ANODIZED COLLECTION

Clear Anodized 103/332

Medium Bronze Anodized 096/307

Dark Bronze Anodized 095/306

Black Anodized 117/353

Copper Anodized 352  
Available on select products only.

## MORE FINISHES FOR THE DARING, AND THE UNDECIDED.

Instead of powder-coating, anodizing is a process that converts the metal surface into a durable finish, creating eye-catching variances in its appearance.

# INDUSTRIAL COLLECTION

A hint of shimmer that sparkles in sunlight, these specially formulated colors mimic the desirable tones of our anodized finish with the lasting benefits of powder-coating.

## Custom Matching

If 75 standard color and texture creations leave you wanting more, we will custom match any color you have in mind. Contact your Sierra Pacific Windows Representative for a color consultation.

## Request a color fan or physical cladding samples.

We have more tools to help with your color selection. Contact your Sierra Pacific Windows Representative for a color consultation.
